

HELPING SCHOOLS, COLLEGES AND
UNIVERSITIES TO MAXIMISE RETURN
ON INVESTMENT AND TRACK YOUR ASSETS...

Education@NCM

*At NCM we have many years of experience
in supporting schools, colleges and universities
with their service requirements for their fleet of printers.*

We're experts in printer maintenance and printer repair. It's all we do.

NCM maximise return on investment on capital equipment for schools and colleges by extending the life of your existing printers, photocopiers and multi-function printers - offering maintenance and repair contracts on your existing assets through our nationwide network of service engineers managed by our Midlands-based call centre.

62% of printers in education are scrapped after only 3 years, when, in reality, the printer has many more years of useful service ahead of it. Not only is this wasteful and unnecessary - it's also expensive. The total cost of ownership over the contract period can prove very expensive - not to mention the impact of replacing equipment every three years on the environment - and how many perfectly good printers with years of life ahead of them end up in landfill. Retaining your assets reduces your carbon footprint and supports your internal environmental policy.

You reduce capital expenditure.

You save on maintenance and repair costs.

Many organisations can also find it a challenge to keep track of their assets. As specialists in networked print solutions, we can carry out an audit of your printer assets - from high volume multifunction printers and copiers in the office or reprographics department to inkjet printers in the classroom - and everything in between, to support the bursar, head, principal or business manager whatever the size of your school or college, and however many sites you operate from.

To find out how NCM can help you extend the life of your existing printers and copiers, maximising your return on investment and reducing the total cost of ownership, email us now or call us on **08000 928 001**
