

## ASSET MANAGEMENT

# Managed Print Services

*The NCM Managed Print Service can typically save you up to 40% on your organisation's internal printing costs. We can audit your current hardware, usage, productivity and consumables and put together a plan for more efficient printing...*

NCM can design and implement Managed Print Services, asset management, usage tracking and forecasting - and ultimately disposal - managing your assets and making them work for your organisation at optimal performance throughout their lifetime.

The experience of the NCM team allows us to look after all of the well known brands of printer in use today, including the full range of printers and multi-function devices from manufacturers including Lexmark, Hewlett Packard, Canon, Samsung, Epson, Ricoh and Konica Minolta.

We also support brands such as Zebra, Intermec, Tally and Fargo for specialist print requirements such as handheld printing or cheque and passbook printing.

NCM's engineers are constantly updating their skills with manufacturer-led training to ensure we are able to meet changing needs and new technologies. Conversely, NCM's experienced team specialise in maintaining and servicing equipment that may be near "end of life" allowing customers to gain added value from older equipment without the need for reinvestment. Some of the devices that NCM service are many years past the service life suggested by the manufacturer.

Let us audit your current printer fleet, usage and consumables. We'll report on productivity, which assets to keep, which assets to dispose of, and where there may be opportunities for cost saving and improvements in productivity.

If new equipment is required, we'll supply hardware at an extremely competitive rate. Wherever possible, we'll work with you to devise a managed print programme using existing assets to maximise your return on investment and reduce TCO.

To find out how NCM can help you review your managed print needs, extend the life of your existing printers and copiers, maximise your return on investment and reduce the total cost of ownership, email us now at [sales@ncmltd.co.uk](mailto:sales@ncmltd.co.uk) or call us on **08000 928 001**
